Work Experience

Verizon

Business salesperson

June 2021 - December 2021 | Greenville, NC

- Ranked in the top 10% of sales within the district every year of tenure.
- Provide expert customer service, ensuring client issues are resolved in a professional and timely manner.
- Worked with potential clients; estimated contracts and present various add-on services.
- Perform various marketing responsibilities including cold-calling, networking, tradeshows, and advertising support.

Clean Slate (Tabula-Rasa)

Contributor

February 24/22 - March 2/22

- GraphQL- worked in typeDefs making sure that the user's request is saved to that person their username and password, and authenticating the user.
- GraphQL - Mutations and Queries by getting the user information and customizing the user choices the user that they chose on to their website.
- Front end Java-Script help, which was fixing the routes on where the user should be taken when they click on a button that'll redirect them
- Deployed this on Heroku while using MongoDB Atlas.

Swab Swapping

Contributor

January 26th 2022 - March 1st 2022

Projects

- Handled front-end JS where I had to make sure the buttons on the front end of the user will move them to a different route or manage the buttons function properly as intended to
- Worked backend JS where I connected the routes so whenever the user wanted to go to a different part of the website they'll be redirected to the desired destination they wanted to click on, as well making the delete button deletes, login button logins, and making sure the user can sign-out as well as signup to our page.
- I had the responsibility of setting up our webpage on heroku
